

## **WE ♥ LABELS**

Product marking with a focus on quality

Product labeling can be just a label, ready to use when you receive it – just as you need. But it can also be a neutral label in a material specified and fits your product, with an associated ribbon, label printer, and software that creates, and prints industry-compliant symbols, barcodes, and other product-specific information.

### Product labeling experts

*"Remarkable solutions for labels barcodes and overlays"*

**These labels must be able to withstand temperatures ranging from +575°C down to -196°C, oil and solvents, UV light, sand, dirt and mechanical wear. Day after day, year after year.**

Grafokett delivers labels and labelling products that can live the same exciting life

as the product they sit on. High quality, the right quality, innovative technology and an absolutely amazing science. We are specialists.

### **Labels have their own science**

**Product labelling experts with more than 30 plus years of experience. We are brand independent and have suppliers all over the world.** We rationalize and simplify the labelling process for every industry. We know everything there is to know about our materials, adhesives, and durability. Above all, we know how to ask the right question and then listen to the answer. Your needs define functionality, and there may be several solutions.

## [EXPERTISE](#)

Labels lead the same life as the product they are secured to. They must withstand extreme temperatures, cold winds, salty water, oil, solvents and mechanical wear. Here's a quick guide:

### **Cold**

We have long experience of industrial labelling solutions and requirement specifications for materials that must be able to withstand the Scandinavian climate and Arctic cold.

### **Sunlight**

We have complete labelling solutions, from printers and ribbons to labels made from the right material, that withstand sunshine and UV light hour after hour, year after year.

### **Heat**

We have comprehensive solutions for labels that must meet different national requirements concerning durability in extreme heat and temperature variations.

## **Moisture**

We know what it takes to survive in harsh environments at sea. We have solutions to tackle salt water, wet winds and mechanical wear.

## **Chemicals**

Spills, oil, dirt, solvents. Labels used for chemical products must meet strict requirements throughout the life cycle.

## **Eco**

We supply eco-friendly products and complete solutions for labelling. One single supplier saves time and costs. Lower stock levels, less administration, fewer contacts and less transport.
