Why Cloudlabel

### **Helps you with the complexity in label management**

Label management software helps with the increasing challenges. Large amounts of data, different products, suppliers, information channels, hardware, software, and geographical barriers make it complex. Cloud label solves this with a cloud-based label printing software with centralized storage of all label data and label design.

### **Automates label printing and saves time**

Cloudlabel saves time for all involved parties. It does this by automating and eliminating unnecessary steps and repetitive tasks such as data input and relabeling.

### **Makes it easy to print labels. Anywhere**

Focus on your core business with a label management system that handles the data and label designs. And makes it accessible for easy printing anywhere in the world.

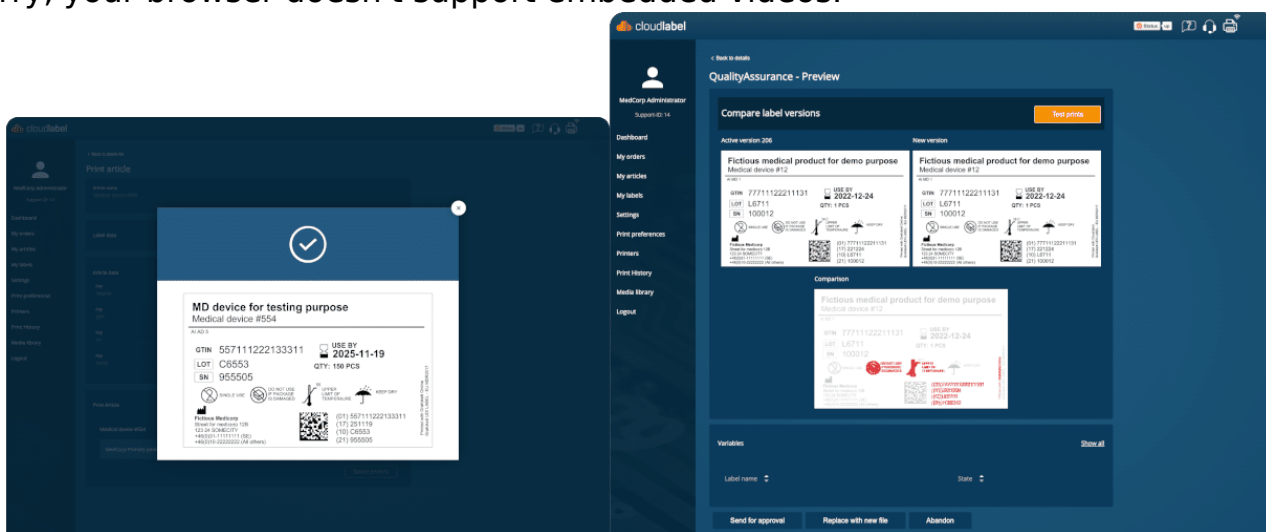

## Increases quality and reducing errors

By eliminating the need to input data several times and automating other actions product labeling errors can be reduced to virtually zero. So you can ensure high quality.

## How Cloudlabel works

Sorry, your browser doesn't support embedded videos.

## Under the hood We use NiceLabel technology

With the power of Nicelabel, we use templates created with the designer where we can utilize the tooling, scripts, and functions that years of experience have resulted in the leading labeling platform in market.

## What's trending? The trends of 2023

According to Technavio, the [global enterprise labeling software market](#) size is expected to grow by **USD 127.4 million** from 2022 to 2027. The market is estimated to grow at a CAGR of **6.66%** during the forecast period.

You can read more [in this article](#)

The 5 trends in enterprise labeling we discovered are all about automation and securing and, at the same time reducing costs. We can achieve the goals by embracing cloud adoption, and automating labeling processes in order to ensure data accuracy through out the business value chain.

Features of Cloudlabel

### **The only label management software you will need**

Cloudlabel is a complete solution for designing, managing, and printing labels as well as generating barcodes. With centralized storage of all your data and label

designs, you can access and print labels anywhere in the world. Securely hosted in the Microsoft Azure cloud, ensuring high availability and secure storage of your label information.

### **Upload and manage labels**

You import your labels, adjust how data is filled, lock or unlock specific fields and create articles to represent specific products.

### **Automate all data input**

Integrate with your ERP or other business systems and let product data stream seamlessly to and from Cloudlabel.

### **Monitor printing orders**

Whether you work locally or globally, you can get an overview and follow the status of all your printing orders in real time.

### **Support +3000 printers**

The system supports more than 3000 label printer models from various manufacturers with an overview of all your printers.

### **Save time with templates**

You get access to a wide range of standardized labels that are compliant with the requirements of your industry.

### **Support your staff**

Helps minimize mistakes and provides complete information to your staff, eliminating the need to unpack and check contents.

### **What our customers are saying**

*“We save a lot of time on central control and the system facilitates the staff because everything is printed automatically”*

**Ronny Jensen**, Region Europe North Deliver Manager,  
Linde Gas AS

*“An easy way for us to create SSCC labels without having to think about standards, barcodes or designing labels. We can focus on our core business and selling our products”*

**Stefan Dempe**, Site manager, Hedlundgruppen

*“Our product boxes need to have labels with text & barcodes, our suppliers can access their products with their own product number to print the correct labels online”*

**Kim Byström**, Purchase and logistics,

Hydroscand AB

**Say hello to better label management**
