Get product labelling that meets the most stringent industry requirements

Do you work with electronics and perform correct labeling? Are you uncertain about what label is suitable for the construction industry or perhaps the pharmaceutical industry? Different industries have different labelling requirements. How do you meet these requirements while creating attractive labels for your products?

We have more than twenty-five years of experience in product labeling. Therefore, we can help you with industry requirements such as Odette, UDI/FDA, EDI, CE, BEAst or UL/CSA. This means that we can assist with efficient labelling whatever it applies to the product or the market in which it will be launched in. Naturally, our product marking is always of the highest quality, just like our other products.

[Contact us](#) and we'll tell you more.

This is how we create your product labelling

We have seen most of the product paths/roadmaps. This knowledge is useful, not only to meet specific industry requirements but also in the design of your product labeling.

Our process with our customers looks like the following:

- We agree on the design of the product labelling
- Prototypes are produced with different options
- Following approval, we assist with assistance in other issues on labelling
- Monitoring ensures that all requirements are met properly

Do you want to know more about our product labelling? Or do you want to know more about the industry requirements such as UL/CSA? Please [contact](#) one of our specialists, we will be happy to help you directly.
